14. Estimated time required to complete the application of water to beneficial use. 15. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use: This temporary change of manner of use and place of use is for emergency purposes only. Under normal conditons, Brady Power Partners would need the 0.167 cfs of water flow to supply geothermal heat to their powr plant, as provided for under the existing permit. s/ Missy Payne /Missy Payne, By251-Ralston-Street-Permitting-Agentab/js\_\_\_\_ Reno, NV 89503 Compared Protested..... APPROVAL .....OF STATE ENGINEER This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: This temporary permit to change the place of use and manner of use of a portion the geothermal fluid heretofore granted under Permit 57242 is issued subject to the terms and conditions imposed in said Permit 57242 and with the understanding that no other rights on the source will be affected by the change proposed herein. This temporary permit is issued subject to existing rights. It is understood that the amount of geothermal fluid herein granted is only a temporary allowance and the final water right obtained under this permit will be dependent upon the amount actually placed to beneficial use. It is also understood that this right must allow for a reasonable decrease of fluid pressure and heat. The well shall be equipped and maintained to prevent any waste of the geothermal fluid. Accurate measurements must be kept of discharge of the production well and the amount of fluid injected into the injection well to determine the total amount of fluid diverted and consumed for a beneficial use. The production and injection well are to be cemented from the producing levels the surface to protect fresh water zones. This permit is issued subject to the condition that only geothermal fluids are to be diverted and used beneficially for heating purposes and fresh, cold water aquifers are not to be diverted. The used geothermal fluids are to be returned to the source via the injection well. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. (CONTINUED ON PAGE 2) The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to 0.167 cubic feet per second . Work must be prosecuted with reasonable diligence and be completed on or before..... Proof of completion of work shall be filed before..... Application of water to beneficial use shall be made on or before..... Proof of the application of water to beneficial use shall be filed on or before..... Map in support of proof of beneficial use shall be filed on or before.. IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E. Completion of work filed. State Engineer of Nevada, have hereunto set my hand and the seal of my Proof of beneficial use filed. office, this 4th day of. Cultural map filed. A.D. 19. 94 Certificate No ..

EXPIRED

DATE APR - 3 1995

Page 2 59193-T

## (PERMIT TERMS CONTINUED)

A report for this well must be filed under this permit describing the amount of geothermal fluid diverted and consumed to a beneficial use for the duration of this permit. This report must detail the amount of fluid produced, injected and delivered to Gilroy Foods, Inc.

to Gilroy Foods, Inc.

The total combined withdrawal of the geothermal fluid under Permits 57238 through 57245, inclusive, 57286 through 57297, inclusive, and 59186-T through 59193-T, inclusive, shall be limited to 19,572 acre-feet per year withdrawal but the total consumptive use of the geothermal fluid is limited to 4,276 acre-feet per year. The State Engineer does not waive the right to make a determination of incidental fluid losses at any time and impose additional conditions thereto. This permit is further issued subject to the provisions of NRS 533.372(1) and with the understanding that the power or energy generated by the beneficial use of this water or steam is subject to recapture and use within the boundaries of the State of Nevada when the need arises.

This temporary permit is further issued subject to the agreements executed by and between Gilroy Foods, Inc. and Brady Hot Springs Geothermal Associates dated December 18, 1987; Gilroy Foods, Inc. and Nevada Geothermal Power Partners, Limited Partnership dated February 1, 1991; and the State Engineer's Ruling No. 3894 dated June 26, 1992.

The total combined diversion rate of Permits 59186-T, 59187-T, 59188-T, 59190-T, 59191-T, 59192-T and 59193-T shall not exceed 1.34 cfs.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on April 3, 1995 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
